RE: Conditional Use Permit Request for Clay Mining (Serial #2027, Arcadia area)

Dear Mr. Myrin:

At the February 2, 2005 meeting of the Duchesne County Planning Commission, a public hearing was held regarding the subject request. After testimony and discussion, the Planning Commission voted unanimously to approve the request, subject to the following conditions:

1. Applicants or their agents (W.W. Clyde Construction) shall take action as deemed necessary by the County, if complaints are received, to prevent dust from becoming a nuisance.
2. Applicants or their agents (W.W. Clyde Construction) shall remove dirt/mud tracked onto paved county roads as required by the County Road Department.
3. Applicants or their agents (W.W. Clyde Construction) agree that County haul roads shall be maintained and repaired in condition equal to or better than the existing condition of these roads as determined by the County Public Works Director. These roads shall be inspected and videotaped prior to the commencement of hauling to establish their existing condition.
4. Applicants or their agents shall maintain their reclamation bond in effect during the course of the operations. The bond provided to the Division of Oil, Gas and Mining shall name the County as a beneficiary to the level of at least \$1,000.00 per acre disturbed. A copy of the bond submitted as part of the state permit process shall also be provided to the County prior to commencing mining operations on this site.
5. Applicants agree to abide by the reclamation plan approved by the Division of Oil, Gas and Mining and provide a copy of the approved plan to the county prior to commencing mining operations on this site.

If the Division of Oil, Gas and Mining does not require a reclamation plan and reclamation bond, such a plan and bond must still be provided to Duchesne County pursuant to our zoning ordinance. This ordinance allows a period of eighteen (18) months to commence work on this project.
